F77(1)

UNIX Programmer's Manual

F77(1)

NAME

f77 - Fortran 77 compiler

SYNOPSIS

f77 [option] ... file ...

DESCRIPTION

F77 is the UNIX Fortran 77 compiler. It accepts several types of arguments:

Arguments whose names end with `.*f*' are taken to be Fortran 77 source programs; they are compiled, and each object program is left on the file in the current directory whose name is that of the source with `.*o*' substituted for `.*f*'.

Arguments whose names end with `.*F*' are also taken to be Fortran 77 source programs; these are first processed by the C preprocessor before being compiled by f77.

```
C:\prj>ren mytest.exe mytest.old
C:\prj>g77 -o mytest.exe mytest.f
